

# Fumis VERSA

HIDDEN UI WITH SEAMLESS FUNCTIONALITY AND INTEGRATED WIRELESS CONNECTIVITY.

Fumis VERSA  
hidden UI

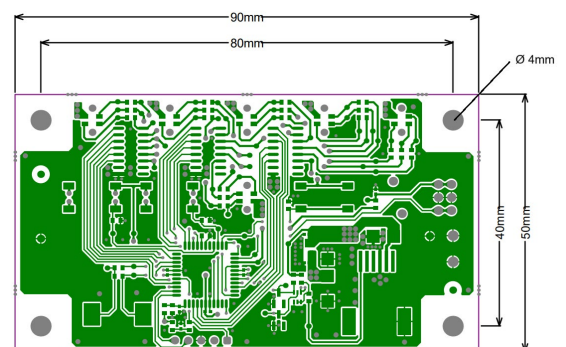

Fumis Versa is a reliable hidden interface for heating appliances, designed for seamless operation via a mobile app, ensuring uninterrupted functionality without compromising the appliance’s visual appeal. Recognizing the necessity for a fail-safe option, Fumis Versa also provides control when the mobile app is unavailable, allowing users to manage essential functions effortlessly.

This next-generation Fumis UI is integrated with wireless connectivity, enabling direct communication with the stove controller, Fumis Alpha or Fumis AIR, ensuring uninterrupted performance.

Experience the peace of mind that comes with Versa, developed to deliver dependable performance for pellet and wood log stoves, maintaining the high standards of functionality that define Fumis Solutions.

## Technical Characteristics
